Academic Details

o **Bachelor of Engineering (B.E.) Information Technology**
Savitribai Phule Pune University, Pune
CGPA: 9.7
2022

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

o **Programming Languages:**
JavaScript, Python, Java, HTML, CSS, SCSS, Typescript
o **Frameworks/Libraries:**
React, Tailwind CSS, Material UI
Redux Toolkit, React Router, Jest,
Tanstack Query, Formik, Yup,
o **Tools:**
Git, NPM, Postman, Webpack, Parcel,
Developer Tools, Vite, ESLint (Linter)

Core Competencies

Agile Methodologies

Software Development Life Cycle

Restful API

Debugging

Containerization

Performance Optimization

Troubleshooting

Personal Details

Date of Birth: 24th October 1999
Languages Known: English, Hindi, Bengali, Marathi
Address: Pune, Maharashtra

Profile Summary

o A detail-oriented professional with **experience of nearly 3 years** in front-end Software Development in the **Cybersecurity and Outplacement** industry.
o Experienced as a Software Developer Engineer at **Randstad Risesmart**, Developed new **React JS** components to **implement features** and **enhance user experience**.
o Implemented best practices like **React Router DOM and Redux** for efficient **Client-Side Rendering**, **Code Splitting**, **Lazy Loading**, and **Memoization** to create lightning-fast applications.
o Adept at using **React Hooks** to **minimize unnecessary re-renders** and **optimize loading times**.
o Possess strong **debugging skills**, ensuring code meets client requirements and delivers **high customer satisfaction**.

Work Experience

UI Developer, Randstad Risesmart, Pune	July 2024 – Present

Responsibilities:
o Led the implementation of a **JWT token-based** authorization system for React widgets using Axios interceptors, and developed a reusable authentication library.
o Improved React widget accessibility for users with disabilities by enabling keyboard navigation and implementing ARIA attributes for better content readability
o **Integrated AI** features with Resume GPT and LinkedIn APIs to automate LinkedIn profiles and resume generation, enhancing user experience.
o Contributed to **translation** efforts for **22 languages**, ensuring consistency and quality to drive revenue growth through broader accessibility.
o Identified and resolved bugs in the **coaching call widget**, improving user connectivity and satisfaction, thereby supporting **revenue** generation
o Developed and maintained a global dashboard **SPA** that displayed resume-writing milestones, utilizing **Material-UI**, **React Router DOM**, and **OAuth token validation** to ensure secure and seamless user experiences.
o Led the migration of a JSP-based opportunity page to a **React widget**, creating an opportunity **microservice** that streamlined performance, improved scalability.

Software Developer Engineer UST, Pune, Maharashtra	July 2022 – July 2024

Responsibilities:
o Achieved a significant **30% reduction in frontend load time**, ensuring a fast and responsive user experience.
o Employed **Jest** to write comprehensive unit tests, guaranteeing the reliability andmaintainability of React components.
o Utilized **Parcel** module bundlers to streamline development and optimize productionbuilds and utilized **Hot Module Replacement** foreefficient development.
Achievements:
o Recognized for rapid skill acquisition through **achieving two promotions in just one year**. Proven ability to quickly grasp new concepts and deliver exceptional results

Academic Projects

Food Ordering App
Tools: React, Context API, React Hooks, Redux Toolkit, Jest, Parcel
